Uses / Applications:
It is used to dilute synthetic and oil-synthetic enamels, as well as fine art paints. It has high solvent power and contributes to the perfect spreading of the coating solution and thus gives an excellent shine to painted surfaces.

Also:
It can also be used as a wax remover, as an oil and grease remover, to clean tar stains on the bodywork of cars, to clean artifacts before painting, and to clean painting equipment.
For degreasing, washing and cleaning operations in the bodywork sector, please refer to products that comply with Italian Legislative Decree No. 161 of March 27, 2006.

How to use:
Dilute the enamel to the desired viscosity for the chosen application. Thicker for brush or roller, more liquid for spray application. Approximately between 10 and 20 %, unless there are different indications printed on the paint can.
