

Technical Data Sheet:
Synthetic Thinner 607

Code:
1153

Ref.: ST153
Rev.: 4
Date:
14/09/2021

Product Type:

Thinner for synthetic paints.

Formats:

Cans 25 - 5 - 1 liters.

Product Characteristics:

Blend of solvents.

Technical Specifications of the Product:

CHARACTERISTIC	UM	VALUE	METHOD	TOLERANCE
Physical state	Liquid		Visual	//
Color	Colorless clear		Visual	//
Density at 20°C	Kg/dm ³	0.808	Met. Int. ISTR. 44	± 0.02

Use / Applications:

Blend of solvents with a distinctive odor formulated to have a solvent power that is higher than regular white spirit. It is suitable to dilute synthetic and oleo-synthetic enamels, rust inhibitors, synthetic primers and fast-drying synthetic primers. Evaporation is slightly faster than the usual white spirit, but it still allows the paint to expand and spread perfectly, giving shine, without any brush marks. It can also be used as a degreaser and cleaner of metal surfaces before painting.

How to use:

Dilute the enamel to the desired viscosity for the chosen application. Thicker for brush or roller, more liquid for spray application. Approximately between 5% and 15 %, unless there are different indications printed on the paint can.

Additional Information:

Not suitable for use on car bodywork.
