Product Type:
Concentrated water-dilutable degreaser for industrial use.

Formats:
Plastic bottle 750 ml with spray
Plastic cans 5 liters.
Plastic jerry cans 20 liters.

Product Characteristics:
Water-based product and nonionic surfactants.

Technical Specifications of the Product:

CHARACTERISTIC	UM	VALUE	METHOD	TOLERANCE
Physical state		Liquid	Visual	//
Color		Clear light yellow	Visual	//
Flash point		Non-flammable	Met. Int. ISTR. 53	//
Density at 20°C	Kg/dm^3	1.07	Met. Int. ISTR. 44	± 0.005
pH	---	12.5	Met. Int. ISTR. 49	± 0.5

Use / Applications:
Professional product specifically for INDUSTRIAL USE. Used for degreasing ferrous metals, aluminum and light alloys. It does not affect painted surfaces, nor plastic, Plexiglas, fiberglass.
It is used generally for cleaning machine tools and equipment of all kinds.
It removes a wide variety of contaminants: greases, oils, greasy inks, dirt holding carbon residues, graphites, and other inert materials.
And also:
It can also be used: in cleaning industrial floors, tiles, glass in fireplaces and wood stoves, furnaces, sanitary ware, and in washing cars (pressure washers).

How to use:
Spray the product, according to the concentrations recommended on the can, on the surface to be cleaned, allow it to act for a few seconds and wipe off with a dry rag.
If halos remain, wipe again with a damp rag.
Shake before use.

Concentrations:
Pure: For the most stubborn dirt.

From 1% to 20% in water:
in all other cases, depending on the thickness and heaviness of the dirt.

Additional Information:
The product forms foams that are easily broken down and that are not very thick, so it is easily rinsed off.

The above information is provided based on our theoretical and practical knowledge. The company, however, does not assume any liability as the conditions of use and application are not subject to the control of Fidea SpA
