

Technical Data Sheet:
Plaster

Code:
2302

Ref.: ST2302
Rev.: 2
Date: 02/12/2010

Product Type:

Plaster

Formats:

5 – 1 kg

Product Characteristics:

The main component is ground semi-hydrated calcium sulphate.

There are traces of natural inorganic impurities.

It is an absolutely natural product, free of additives, obtained from chalk quarries, fired and ground.

Technical Specifications of the Product:

CHARACTERISTIC	VALUE
Physical state	Solid-Pulverulent
Color	White
Odor	None
pH	5.3- 5.7

Setting time:

About 5 minutes

The setting time is also influenced by the ambient and water temperature.

Use / Applications:

It is normally used for moulding work or in construction to fix dowels and frames.

It has a fast setting and is perfectly white.

How to use:

Pour clean water into a container, then add plaster by spreading it evenly until it emerges. The resulting mixture is ready for use.

An electric or pneumatic mixer can also be used. In this case, it must be noted that the shorter the setting time, the longer the mixing time.

(see *Setting times*)
